

**O**ur sweet corn breeding program is based on the need to offer hybrid adapted and developed specially to the characteristics of each productive area.

The competitive level reached allowed our transcendence with our materials, not only within the country, but also in several countries abroad.

Agreements with United State research centers enable us to carry out two campaigns per year and incorporate permanently new germplasm, obtaining all resistance and progress provided by the latest technology, as well as the continuous training of our technicians.

# Sweet Corn

**BATTER TR**

**Super sweet.**  
High productivity.  
Used for fresh market and processing.  
Great taste.  
IR Common Rust.

**CACIQUE**

**Super sweet.**  
Early maturity. Productivity and quality.  
Excellent taste.  
Used for fresh market.  
IR a Helminthosporium Turcicum

**BAS 3475**

**Super sweet.**  
Excellent yield and quality.  
Long ears, great tasting. Good husk protection.  
Used for processing and fresh market.  
IR Common Rust, Helminthosporium Turcicum, Stewart's Wilt

**BASS 1441 TR**

**Super sweet.**  
Great adaptation to early and late sowing.  
Long ears with good tip fill and good husk protection.  
Used for fresh market.  
HR Helminthosporium Turcicum / IR Common Rust

**BASS 1735**

**Super sweet.**  
High productivity. Ideal for pollination in low temperature.  
Dark green plant, good tip fill.  
Used for fresh market.  
HR Helminthosporium Turcicum / IR Common Rust

**BAS 3240**

**Tropical super sweet.**  
High yield.  
Vigorous plant (2.10 mt) with excellent dark green colour .  
Kernel with good deepness (10 mm)

**F**rom 1931 **BASSO Seed** develops its activities in the area of horticultural seeds. The ideals of its founders were the engine of its development over the years.

Offering the variety most suitable for every need and permanent commitment to the producer, **BASSO seeds** strengthens its actions, integrating:

- RESEARCH
- DEVELOPMENT
- PRODUCTION OF SEEDS
- DISTRIBUTION IN ARGENTINA
- EXPORT

These activities are a source of pride and inspiration for managers, technical and for those who, in one way or another, make it possible for the company.

Hybrids and varieties developed by BASSO Seeds enjoy the same recognition in Argentina and different countries of America and Europe, where seeds are exported.

The seeds produced by the company are the fruit of the more evolved technique, giving as a result that our prestige grow and harvest day after day.

## Butternut

### BAS 1138

Late cycle.  
Big-medium fruit, very uniform. Very good internal and external colour.  
HR to cracking  
12° Brix

### BAS 824

Early cycle.  
Small fruit, light-coloured with internal bright orange colour  
HR Zymv / IR PM  
13° Brix

### BAS 607

Early cycle.  
Small semi compacted plant  
Medium size fruit.  
Excellent colour  
13° Brix

## Zucchini

### ROCIO RV

Slightly cylindrical shape fruit.  
Light green colour, very bright.  
HR Zymv, WMV2  
IR PRSV, Oidio

### FELIX

Slightly cylindrical shape fruit, green colour spotted in dark green.  
Big, vigorous and rustic plant.  
Good productivity.  
HR Oidio / IR Zymv  
CMV PRSV

### FLORA

Slightly balloon-shaped fruit.  
Intermediate green colour spotted in dark green fruit.  
HR Zymv, WMV2 IR PRSV, Downy Mildew, Oidio

### BAS 419

Slightly balloon-shaped fruit.  
Dark green stripped in intermediate green fruit.  
HR WMV2, IR ZYMV

## Round Squashes

### ANGELO F1

Intermediate green fruit, very bright.  
Medium and semi compacted plant with good vigor.

### VICTORIO F1

Intermediate green fruit, very bright.  
Small and compacted plant with good vigor. High productivity

### MAXIMO F1

Medium, semi compacted plant with high productivity.  
Light green fruits.
